

The end of INTERMOVE For Trainers is approaching

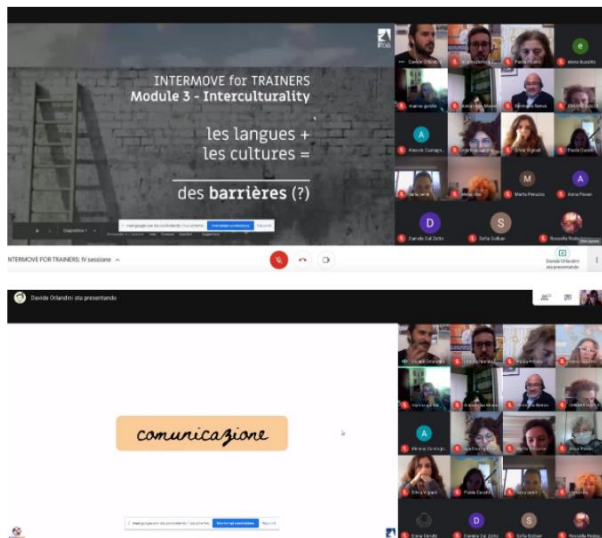

Only two months to go until the end of the project! Nevertheless, the partnership is very proud of all activities done and looking forward to organise the Final Conference of the project.

Because of the restrictions caused by the COVID-19 pandemic, unfortunately, this Final Conference will be organised online the 17th of May. But the partnership will have the opportunity to gather in this event participants from different countries, making this activity more enriching. During this conference, one of the INTERMOVE activities tested with trainers will be carried out online with all participants. We are sure that it will be a very successful final conference.

In addition, during the last months of 2020 and beginning 2021 several trainings with 3rd stakeholders have been organised, obtaining very positive feedbacks. In the next articles you will know more about some of these trainings!

The pandemic cannot stop INTERMOVE For Trainers!

Despite the fact that the pandemic also hit the country hard during the last months of 2020, ENAIP Veneto focused on the development of the INTERMOVE Network. The Italian organisation worked hard to adapt the learning materials developed in IO1 and IO2 to a digital environment and successfully built up an online training called "INTERMOVE FOR TRAINERS - Intercomprehension ed Interculturalità per formatori, docenti, coordinatori di mobilità", a 15 hour course, mixing interactive and exciting sessions.

For the first time, Daniela and Alessio played the role of IC facilitators, supported by IFQA's senior partners of the project, and arranged IC classes adapting contents to distance learning, mixing traditional teaching methodology with interactive web-based tools, such as Mentimeter and Jamboard, videos, online games, cooperative activities.

Alessio enthusiastically said: "Although a plurilingual group is sometime an added value when working with intercomprehension, the group of Italian participants was very motivated and collaborative: everyone grasped perfectly the potential of the modules and embraced the INTERMOVE philosophy!"

As proved by the encouraging results of the final evaluation session, all the participants requested further insights on the topic and showed their will to collaborate in the future.

This first round of training for third-organisations has been a success we are proud of and grateful for, considering the tough time Italian VET centres and schools were going through.

Irish partners organised with success the INTERMOVE For Trainers training!
